DETAILED ACTION

1. This communication is in response to Applicant's communications filed on 12 July 2010. Amendments to claims 1, 4-6, 8-9, and 11-15, and cancellation of claims 7, 10, and 16 have been entered. Rejections made under 35 USC 103 and 35 USC 112 in the last office action have been withdrawn in view of the amendments. Claims 1-6, 8-9, 11-15, and 17-20 are pending in this application.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

3. The prior art of record (Lencki et al., US 2002/20049617 A1 in view of Crus et al., US 5133068) teaches a method of determining a renewal deductible for an insurance policy, the method comprising: providing a plurality of interrelated tables from a storage device to a microprocessor of a computer system; providing a plurality of policy variables for each table to the microprocessor; providing a first key reference in a first table to the microprocessor, the first key reference identifying a first specific group of the policy variables; retrieving a current deductible associated with the insurance policy; matching the first key reference to a second table by the microprocessor, wherein the first key reference identifies a second specific group of the policy variables and a plurality of additional key references, the plurality of additional key references including an available deductible key reference and a new deductible key reference, and wherein the second table includes a default deductible, and a new deductible indicator having

either a positive state or a negative state; matching the available deductible key reference to a third table by the microprocessor, wherein the third table includes a set of available deductibles; matching the new deductible key reference to a fourth table by the microprocessor, wherein the fourth table comprises a set of old deductibles mapped to a set of new deductibles; accessing, by the microprocessor, the second table using the first key reference to retrieve the default deductible and the new deductible indicator; accessing, by the microprocessor, the third table using the available deductible key reference to retrieve the set of available deductibles; accessing, by the microprocessor, the fourth table using the new deductible key reference to retrieve the set of old deductibles and the set of new deductibles; determining, by the microprocessor, that the default deductible is less than the current deductible for the insurance policy;

4. Even though, the prior art of record teaches the above-mentioned features, the prior art of record fails to teach a method of determining a renewal deductible for an insurance policy, the method comprising: setting the renewal deductible equal to the current deductible if the new deductible indicator is in the negative state and the set of available deductibles includes the current deductible; and mapping the current deductible to one of the set of new deductibles in the fourth table and setting the renewal deductible equal to the one of the set of new deductibles if the new deductible indicator is in the positive state and if the set of old deductibles includes the current deductible.

5. For these reasons claims 1, 9, and 15 are deemed to be allowable over the prior art of record and claims 2-6, 8, 11-14 and 17-20 are allowed by dependency on an allowed claim. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and cited in the PTO-892 Notice of References Cited.
